EXPERIENCE

Community Partners International

09/2018-08/2023

Software Developer

Yangon, Myanmar

- Developed and maintained Health Management Information System **using Node.js, React.js, and Oracle database**, ensuring real-time health data availability and elevating healthcare accessibility in remote areas.
- Implemented **RESTful APIs with Express.js**, optimizing request handling and caching, which made better API response time by 30% and streamlined front-end data flow efficiency.
- Created reusable responsive UI components **using Material UI and React.js**, refining form usability, data readability and navigation, resulting in faster patient record access, fewer input errors, and higher client satisfaction.
- Designed scalable database schemas and optimized **Oracle** queries to handle large volumes of health data.
- Conducted comprehensive **end-to-end testing** to ensure application stability and performance, identifying and resolving critical issues early in the development cycle.

Myanmar Information Technology Pte.ltd

01/2015-08/2016

Software Developer

Yangon, Myanmar

- Implemented Health Information Management System with pharmacy operations, utilizing **VB** for windows and **Java** for the web to standardize data exchange, enhance code reusability, and streamline development.
- Developed intuitive interfaces with **AngularJS** and **Java**, improving navigation, form accuracy, and usability, while creating comprehensive end-user documentation, which decreased training time for new staff.
- Utilized **MVC patterns** to improve code maintainability, minimize debugging time by 20% and enable faster implementation of change requests and version updates.
- Boosted team productivity by 30% by developing reusable functional modules, optimizing **MSSQL** database queries, and automating patient data entry, making fewer manual efforts by 50% and enhancing reporting accuracy.
- Performed pre-production testing on all data entry forms, identifying and resolving critical issues early, which reduced post-launch errors by 60% and significantly upgraded system stability.

SKILLS

Languages: JavaScript, Java

Frontend: React.js, Material UI, Bootstrap, HTML5, CSS3

Backend: Node.js, Express.js, JWT, RESTful API architecture

Databases: Oracle, MySQL, MSSQL

DevOps & Tools: Git, GitHub, GitHub Action, CI/CD, Docker, Visual Studio Code, IntelliJ, Eclipse

Other Skills: AWS, Spring Boot, JUnit, Mockito, Next.js, Angular.js, Jest, Mocha, Typescript, GraphQL, Kafka, PostgreSQL, MongoDB

Certification: [AWS Certified Solutions Architect – Associate](#)

EDUCATION

Maharishi International University

08/2023- 04/2026

Master of Science in Computer Science

Fairfield, IA

Key Courses: Web Programming, Cloud Computing, Web Application Architecture,
Enterprise Architecture, Algorithms, Applied Software Development, Artificial Intelligence

In progress via distance education; Expected graduation in April 2026; Available for full-time, W-2 employment.

University of Computer Studies, Yangon

12/2008- 11/2012

Bachelor of Computer Science (Honors) in Computer Science

Yangon, Myanmar
